PROFILE

I am a passionate and driven undergraduate student with a strong focus on web development, app creation, and entrepreneurship. Currently pursuing a degree in [Rathinam Technical Campus], I am actively building my skills in coding, design, and technology. As the founder of Fixd, I specialize in delivering high-quality solutions that help small and medium-sized businesses grow.

I am proficient in web technologies like HTML, CSS, and JavaScript, as well as mobile app development with Flutter. In addition, I've also gained experience in security frameworks, project management, and client relations, which has allowed me to work on various projects and successfully build relationships.

I'm always looking for new challenges and opportunities to expand my knowledge and apply my skills to real-world projects. With a keen eye for design and a passion for solving problems, I strive to create solutions that are both innovative and practical
